

QUIGLEY CREEK OPERATORS

System: Ranchview Estates Water District

Date: 9/16/2024

Water usage:

The total domestic water usage for the month of August was 521,419 gallons for an average daily flow rate of 16,819 gallons. This is a slight decrease from July by close to 1,000 gallons per day which is a good thing to see. The total flow of the irrigation system for the month of August was 6,439,245 gallons for an average daily flow rate of 207,717 gallons. This is a slight decrease in usage from last month by 20,000 gallons per day which is very encouraging to see. After looking at past years flow rates this is a very consistent flow for the month. For the year as a whole the total flow through the irrigation system has been 24,372,134 total gallons which is 4,000,000 gallons more than last year.

Projects:

I have been locating the curb stops and main valves around the subdivision and have gotten the North side of Lariat and along winter wheat. I have switched the maps to a google file that seems to be easier to map and can give everyone access without having to keep track of a folder of maps.

Sampling:

ALI monthly sampling completed.
