

QUIGLEY CREEK OPERATORS

System: Ranchview Estates

Date: 11/18/2024

Water usage:

The total domestic water usage for the month of October was 407,536 total gallons for an average daily flow rate of 13,146. This is another slight decrease from last month by 2,500 gallons per day but is still consistent with previous flow rates.

The total flow through the irrigation system for the October was 1,076,989 gallons for an average daily flow rate of 34,741. This is a significant decrease in usage from last month by 141,000 gallons per day which is a very welcome sight. For the DNRC reporting year the total flow through the irrigation system was 29,643,536 gallons or 90.97 Acre Feet which would be 1,500,000 gallons more than last year.
